BRIEFING

- General overview
- MPG per cylinder count
- Cylinder count effectiveness

Cylinder Count Effectiveness

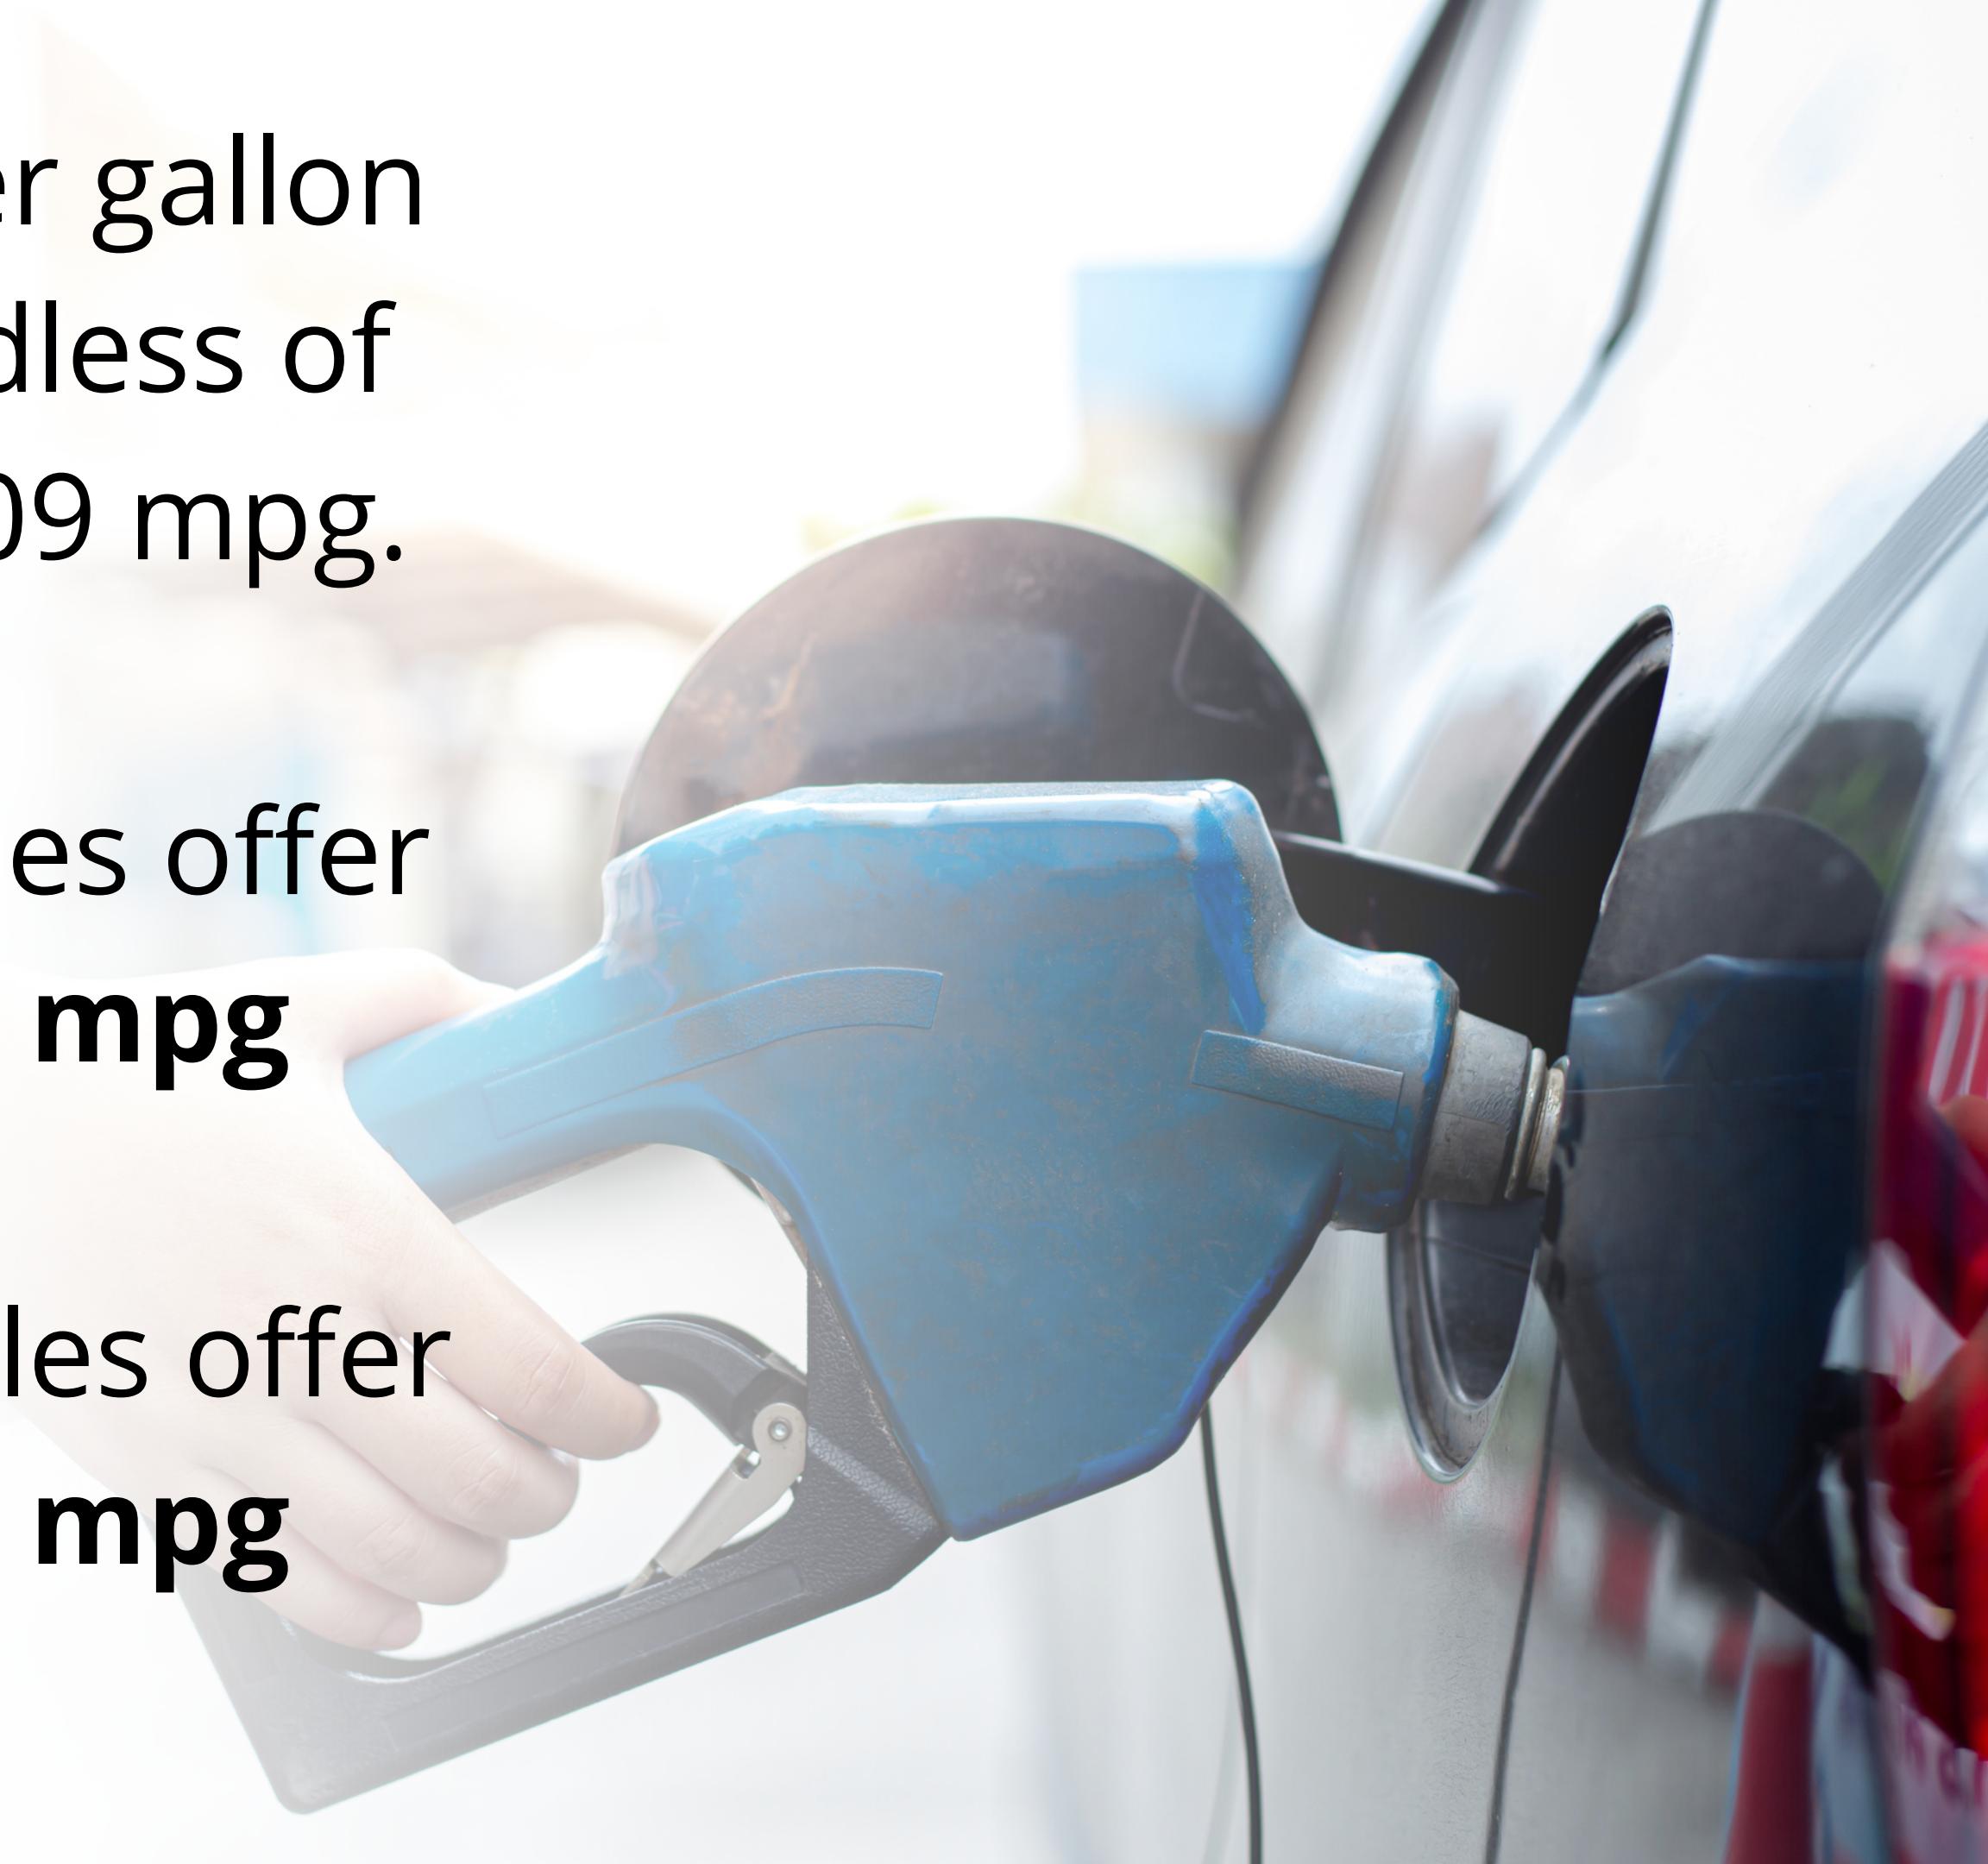

How far can your cylinders take you?

The average miles per gallon
of all the data regardless of
cylinder count is 20.09 mpg.

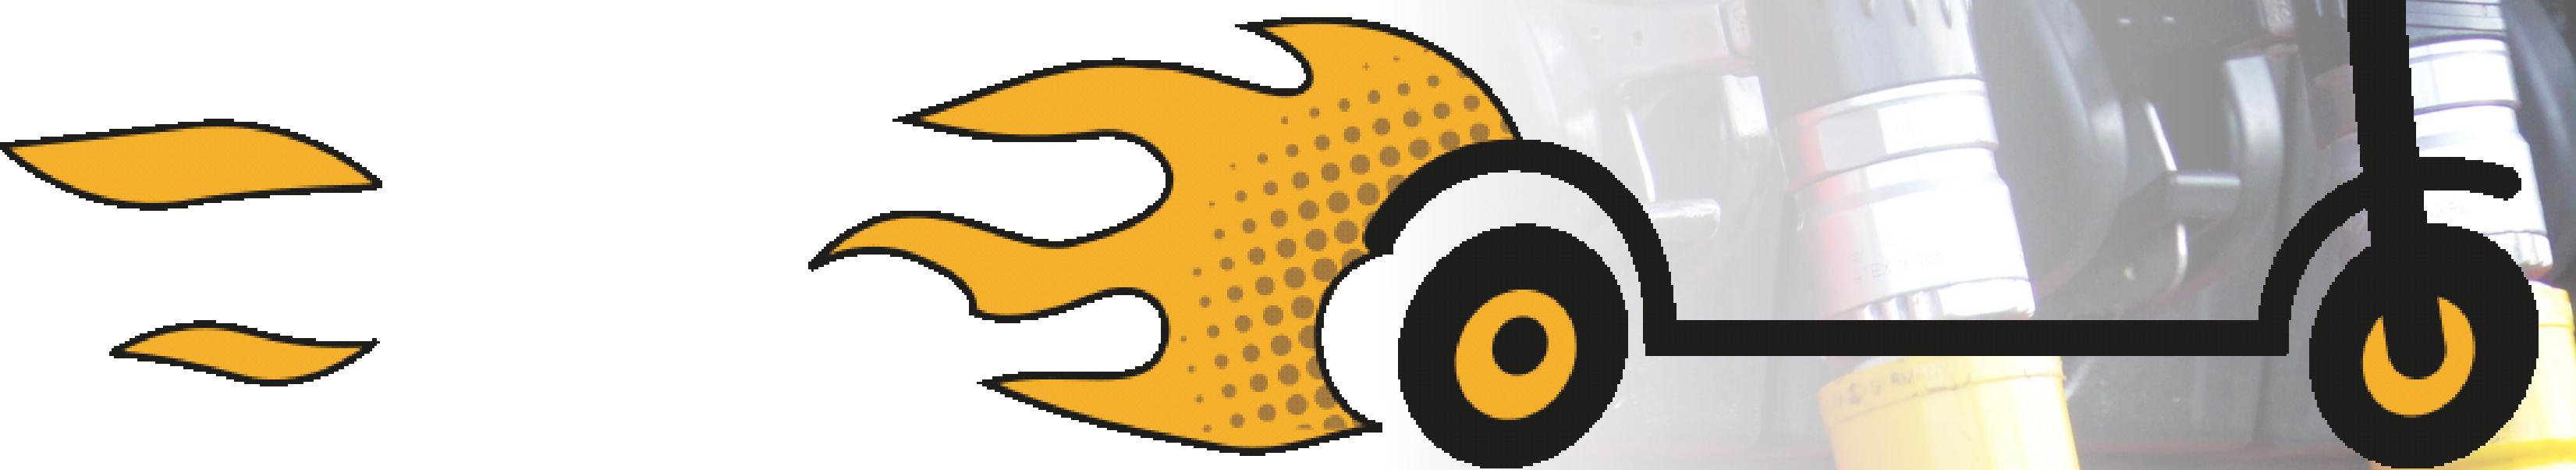

The **4-cylinder** vehicles offer
an average of **26.6 mpg**

The **8- cylinder** vehicles offer
an average of **19.2 mpg**

**In conclusion, we find
that the less you desire
to fill your vehicle the
smaller your cylinder
count should be.**

Happy speeding!
